Career Paths	4

ANHS is pleased to announce a new tuition option to make course planning and paying for school even easier for our students. Here is how the new tuition option will work:

You will pay our regular low price of \$375.00 per 1st semester 0.5 credit course, but you now also have the option to pay only \$175.00 per 2nd semester 0.5 credit course if you purchase them together.

In other words, you would pay \$550.00 for the full year 1.0 credit course at a savings of \$200.00 per full year course!

If you are a full time student taking four courses, that could lead to a savings of \$800.00 per year!

We also have payment plans available to help make our tuition even more affordable and convenient.

Therefore, the next time you need to enroll in the

first semester of a course, such as English 10A, consider paying for the next semester, English 10B, to save time and money.

You can call to speak with a student services representative to learn more about this new tuition option.

Call 800-968-4034.

The Dean Scene: Summer Courses

We are now enrolling for summer school 2011!

All of our courses are available during the summer session. You can also continue to work on courses in which you are currently enrolled to save time or catch up for the fall semester.

Students from any school are eligible to take our courses, so please spread the word to your friends and family! They can get started today by

having a school official complete a [transfer of credit approval form](#).

Summer is a great time to enhance your transcript by taking electives that will help you stand out when applying for college or a job.

For example, you can take our medical terminology course if you are interested in pursuing a career in the medical field.

Perhaps taking our Marine Biology course or Oceanography course will appeal to future scientists, or you could take one of our Microsoft courses, where you will learn skills that can be applied to almost any career.

The best part is that you can work on your classes at anytime, so you don't have to miss out on the summer fun!

Student Spotlight-*Hannah Metviner*

Grade: 10th

What state do you live in?

Connecticut

Why did you decide to attend Allied National High School?

It was the only reasonable high school I could attend in my area.

What is your favorite part of school?

Being able to do my work at whatever time I want instead of sticking to a schedule.

What are your plans for after high school?

My plans are to go to a good college.

What do you want to do for a living?

I want to go into the social working field.

Do you have any hobbies?

I like to hang out with friends and do service in my Alateen group.

Do you have any pets?

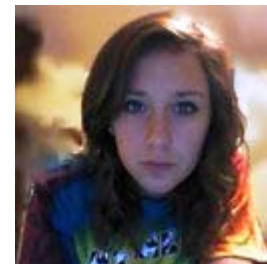

Yes, I have two dogs, a cat, and a turtle.

What is your favorite book?

Dive

What was your favorite trip?

Going to Alabama to visit my family every year when I was younger.

“He who dares to teach must never cease to learn.”

- Anonymous

Staff Spotlight- *Elisabeth Maza*

Years of teaching experience: 3

What state do you live in?: California

Why did you choose to teach at Allied National High School?: I chose to teach at ANHS because I wanted to have the experience of teaching online and the ability to reach students I would not otherwise have had an opportunity to teach.

What was your major in college? : My major in college was Spanish with a concentration in Linguistics and Language Acquisition. I attended California State University

Long Beach.

What was your favorite trip and why?: One of my favorite places to visit is Mexico, where my father was born. It is a colorful and fascinating country and of course, it is always nice to see my family members who still live there.

Do you have any hobbies? What are they? Music is one of my favorite hobbies.

I have been singing in choirs and taking voice lessons since I was in high school. Currently, I am involved in the music ministry at my church and sing for special occasions

such as weddings and funerals.

What is your favorite book? : I love to read, so it would be really hard for me to choose just one favorite book. I especially enjoy historical fiction and fantasy.

Do you have any pets? I don't have any pets right now, but I have had dogs in the past.

Just for Fun! : Brain Teasers, Riddles, and Puzzles

Riddle #1: For some I go fast for others I'm slow. To most people, I'm an obsession relying on me is a well practiced lesson. What am I?

Riddle #2: Which triangle has a bigger area:

1. A triangle with sides measuring 300, 400, and 500.
2. A triangle with sides measuring 300, 400, and 700.

Riddle #3: There are 20 people in an empty, square room. Each person has full sight of the entire room and everyone in it. If you are not allowed to move in any way (other than your eyes). Where can you place an apple so that all but one person can see it?

ESLR's: Persuasive Communicators

ANHS prepares our students to become persuasive communicators.

This expected schoolwide learning result helps to ensure that our students can successfully communicate their well-educated perspective to others.

ANHS graduates are able to:

- Transport and define communication through a variety of media
- Write English clearly and proficiently
- Effectively communicate with people from a variety of backgrounds and experiences

This skill has many direct real world applications. A

persuasive communicator can apply their talent to public speaking, college essays, cover letters, resumes, interviews, and many other scenarios that can shape a person's future success.

We will evaluate student writing abilities annually through our schoolwide writing prompt and modify curriculum to ensure that ANHS students will hold this key to success!

"The important thing is not to stop questioning."

-Albert Einstein

College Prep: Summer Fun and Planning

Summer is around the corner, and that means time for relaxation and fun in the sun! It is also time for some exciting college planning!

"Senior Action Plan:

By this time in the year, seniors should be preparing to enter the college world in a few short months. While most of your heavy planning is done, there are still important details to finalize.

Now is the time to complete any outstanding paperwork for your fall semester such as course schedules, or financial obligations.

You should also begin to plan your living situation, on or off campus, for the fall semester. Make sure to budget enough money for food or purchase a meal plan.

Junior Action Plan:

Juniors have much more to do over the summer.

It's time for you to visit colleges! This can be a very excited part of selecting the right school.

Take campus tours and, at colleges you're serious about, schedule interviews with admission officers.

Be sure to bring your [campus visit checklist](#).

Request applications from the colleges you're planning to apply to.

Check important dates; some colleges have early dates or rolling admission.

Consult the [College Application Calendar](#) and the [Financial Aid Calendar](#) for a basic idea of the applications timeline."

As an online student, you already have a working relationship with the fascinating and complex world of computers, which is why you may want to consider this field as part of your career choices.

"The computer information systems industry provides IT services on a contract basis, including custom computer programming services; computer systems design and integration services; and computer facilities management services.

Large employers include insurance and financial firms, government agencies, business management organizations, and manufacturers.

Employment of computer and information systems managers is expected to grow 17 percent over the 2008-18 decade, which is faster than the average for all occupations. New applications of technology

in the workplace will continue to drive demand for workers, fueling the need for more managers. To remain competitive, firms will continue to install sophisticated computer networks and set up more complex intranets and websites. They will need to adopt the most efficient software and systems and troubleshoot problems when they occur. Computer and information systems managers will be needed to oversee these functions.

Prospects for qualified computer and information systems managers should be excellent. Workers with specialized technical knowledge and strong communications and business skills, will have the best prospects. Job openings will be the result of employment growth and the need to replace workers who transfer to other occupations or leave the labor force.

Wages of computer and information systems managers vary by

specialty and level of responsibility. Median annual wages of these managers in May 2008 were \$112,210. The middle 50 percent earned between \$88,240 and \$141,890." Bureau of Labor Statistics, 2009.

Allied American University, among other schools, offers a **Bachelor's of Science Degree in Computer Information Systems.** The program provides the foundational background for students seeking to acquire a high-level of knowledge from a broad base of computer and information science concepts and skills to create solutions to contemporary problems in computer science and information management. Students will acquire the critical and current knowledge and skills needed to integrate software engineering, programming, database development, Internet and information management.
