ANHS is pleased to announce that we are offering a \$100.00 discount on each course you enroll in between now and September 30, 2010!

Do not miss this opportunity to save money on your tuition! If you are ready to enroll in your fall semester courses, make sure you do so by September 30, 2010 to qualify for the discounted price.

This is also an excellent opportunity to get to know our

program better for someone that is considering switching to ANHS as their school of record. You can enroll in one of our courses, at the discounted rate, and experience all that ANHS has to offer before making

the transition to a full time student.

If you would like more information on this limited time discounted price, please contact our Student Services department at (800) 968-4034.

The Dean Scene: Visit the Math Help Center

All ANHS Math students can get help from their instructor, Mr. Wolf, in real-time.

Mr. Wolf will be hosting an office hour in the Blackboard Math Help Center on Mondays. Currently he is available from 1:30 to 2:30 pm Pacific Time. Beginning on September 13, he will change the time and be available from 5:00 pm to 6:00 pm Pacific Time.

Accessing the help center is easy! You can find the help center with the rest of your courses on the right-hand side of your home page in Blackboard. Once you are in the help center, you simply click on the "Office Hours" button on the left hand side of the page and then press the "Join" button to enter the session.

You can ask Mr. Wolf for help with your questions,

and he can provide you with examples. You will be able to work through the problem together using the real-time chat feature and virtual whiteboard.

Excelling in Math online takes a lot of dedication and practice. Do not pass up this opportunity to get help from your instructor!

For more information, please contact us at (800) 968-4034.

Student Spotlight- *Joy Marshall*

“Education is the ability to listen to almost anything without losing your temper or your self-confidence.”

~Robert Frost

What state do you live in? Ft. Knox, Kentucky.

Why did you decide to attend Allied National High School? The program in the Army, "MyCAA", directed me to Allied National High School; they told me this is one of the best high school programs out there for education.

What is your favorite part of school? Knowing that, for the first time in my life, I am accomplishing and learning new studies that I thought I would never get the chance to

do. I look forward to doing my assignments everyday.

What are your plans for after high school? Going to college.

What do you want to do for a living? I want to become a drug counselor for teenagers.

Do you have any hobbies? I love to play Texas Hold'em, and I love to work in my garden.

Do you have any pets? I have three pets, Johnny Cash is my St. Bernard, Sasha is my Bassett

hound, and Sammy is my cat.

What is your favorite book? Memoirs of a Geisha.

What was your favorite trip? My favorite trip was to Cozamel, Mexico

Staff Spotlight- Marjorie Fabio

How many years have you worked at Allied? For about 6 years now!

What do you enjoy about working at Allied? Working at Allied has been a very rewarding experience because I am able to help students reach their goals. It feels good to know I have made an impact in their lives.

What advice do you have for ANHS students and parents? “Overcoming the hard work you’ve accomplished in life will pay off in the end.”

What was your favorite trip and why? Every year I look forward to

spending time with my family at Glamis on Thanksgiving weekend to eat and enjoy the fun festivities. We enjoy our quality time spent together during the weekend by riding on our quads and in my Dad's sand car.

Do you have any hobbies? I love shopping for shoes! I also like to keep active by playing tennis, running, going to my kickboxing classes and playing volleyball.

Do you have any pets? Yes. I have a chocolate Cocker Spaniel whose name is “Isabella” and answers to “Chocolate”. She has been attached to

my hip since I have first held her in my arms. She is a great companion and I would not trade her in for the world.

What is your favorite book? “A Light in the Attic” by Shel Silverstein. This book brings back great childhood memories.

Just for Fun! : Brain Teasers, Riddles, and Puzzles

Riddle #1:

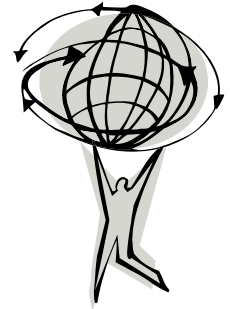

A school has a strange principal. On the first day, he has students perform an odd ceremony. There are one thousand lockers and one thousand students. He asks the first student to go to every locker and open it. Then he has the second student go to every second locker and close it. The third

goes to every third locker and, if it is closed, he opens it, and if it is open, he closes it. The fourth student does this to every fourth locker, and so on. After the process is complete with the thousandth student, *how many lockers are open?*

Riddle #2:

If you put a coin in an empty bottle and insert a cork into the neck of the bottle, *how could you remove the coin without taking the cork out or breaking the bottle?*

See the answers at the bottom of page 4.

ESLR's: Open Minded Learners

ANHS prepares its students to become **Goal oriented students** who...

1. Secure measurable goals that are both personal and professional
2. Develop a plan to achieve post graduation goals
3. Are self directed learners

4. Demonstrate time management skills to meet academic deadlines

The flexible scheduling and self-paced environment is a great privilege and responsibility that helps students to develop into people that have the skills needed to identify

and reach their goals. This process begins by creating a schedule for completing courses, and ends with self-reflection during our graduation exit interview.

Being a goal-oriented person will help ANHS students succeed in their academic and personal life and their career!

"It is today we must create the world of the future."

Eleanor Roosevelt

College Prep: Should you take the Act® Test?

"The ACT® test assesses high school students' general educational development and their ability to complete college-level work.

The multiple-choice tests cover four skill areas: English, mathematics, reading, and science. The Writing Test, which is optional, measures skill in planning and writing a short essay.

The ACT is universally accepted for college admission, and some schools

prefer to receive both SAT and ACT scores.

The 2010–2011 basic registration fee is \$33.00, which includes sending score reports to up to four college choices. The basic registration fee for the ACT Plus Writing is \$48.00.

It takes just over 4 hours for the ACT without the Writing Test including administration instructions and breaks.

Actual testing time is 2 hours and 55 minutes, broken down as follows:

English: 45 minutes
Math: 60 minutes
Reading: 35 minutes
Science: 35 minutes

The ACT is administered on six national test dates: in September, October, December, February, April, and June.

The ACT also provides test takers with a unique interest inventory that provides valuable information for career and educational planning."

Government initiatives are spurring growth in the green industry – meaning more jobs that promote environmental benefits. The current administration has committed to doubling U.S. renewable energy by 2012, and plans to invest \$150 billion over 10 years toward the nation's clean energy economy.

Sustainable building, solar PV systems and other renewable energy fields will provide the pathway to a solid, reliable future in a career that makes a difference every day.

In fact, 29 U.S. states have set renewable energy goals. With careers in solar and sustainable building on the rise, Allied Schools offers the courses needed to build and maintain one of these "jobs of the future."

There are a wide variety of careers available in the

renewable energy industry – including PV systems installer, green real estate agent, project manager, consultant and more. This provides an exciting opportunity to create an innovative career for the 21st Century. You can opt to green your career in a traditional role, such as communications, community outreach and sales/marketing, or you can join today's leading renewable energy fields.

Allied Business School's vocational course, *The Business of Solar* provides you with a strong foundation of the fundamentals of the solar energy business – from building your business to developing selling strategies. Your knowledge of applications of solar energy in homes and businesses will give you the basis to promote the environmental, health and financial benefits of

this leading renewable energy.

Allied American University offers courses in renewable energy and technologies as well.

Their Photovoltaic Systems students develop trade knowledge of photovoltaic (PV) systems based on the learning objectives for NABCEP entry-level certification. Solar-electric technologies are introduced, along with the history and current trends in the industry.

ANHS is currently developing an elective solar course that will allow students to earn dual credit at AAU and ABS for taking the class. Taking a course of this nature will give students a head start in this leading industry, and in their post graduation academic plans.

For more information, please contact the Dean.

Just for Fun! Answers

Riddle #1 Solution: The only lockers that remain open are perfect squares (1, 4, 9, 16, etc) because they are the only numbers divisible by an odd number of whole numbers; every factor other than the number's square root is paired up with another. Thus, these lockers will be "changed" an odd number of times, which means they will be left open. So the number of open lockers is the number of perfect squares less than or equal to one thousand. These numbers are one squared, two squared, three squared, four squared, and so on, up to thirty one squared. (Thirty two squared is greater than one thousand, and therefore out of range.) So the answer is thirty one.

Riddle #2 Solution: Push the cork into the bottle and shake the coin out.
